Education

University of San Carlos Talamban, Cebu
Bachelor of Science in Information Technology July 3, 2026
Redemptorist Educational Assistance Program Scholar Academic & Financial, 2020–2026

Experience

Lexmark Research and Development Corporation (LRDC) Cebu Business Park, Cebu
IT Operations Student Intern | A subsidiary of Xerox Corporation September 2025 – February 2026

- Developed a Microsoft Power Automate attendance workflow for a 10-person team that calculated daily clock-out reminders and delivered Friday work-hour summaries, reducing manual tracking from 5-15 minutes per day to 1-2 minutes.
- Configured and troubleshot Cisco devices (2970, 3745, 3750G, 4510R-E), including VLAN setup, OS recovery, and secure erasure.
- Supported CMDB validation and network deployment, including access point installation and layout planning.

Projects

PAD-Q — Founder & Full-Stack Developer
Next.js, React, TypeScript, Firebase, Vitest

- Independently architected and engineered a real-time queue and matchmaking platform from scratch, managing all end-to-end development for scoring, analytics, and session recovery.
- Autonomously designed and debugged four complex matchmaking modes, validating system reliability and AI-assisted logic through 146 automated Vitest tests simulating up to 50 concurrent players.

PANN — Client Project Suite, Full-Stack Developer
Vue, Django REST Framework, MongoDB, DynamoDB, PayMongo

- Contributed reporting, promotions, notifications, user management, payments, and supporting API functionality across an offline-capable POS, Backoffice, and customer-ordering ecosystem.
- The system completed 255 documented black-box tests; the customer website earned 4.25/5 from 132 customers, while Backoffice and POS reached 4.96/5 after improvements.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java
Frontend: React, Next.js, Vue, HTML, CSS, Tailwind CSS
Backend: Django, Django REST Framework, Node.js, Express.js, REST APIs
Databases: Firebase/Firestore, MongoDB, MySQL, DynamoDB
Cloud & Tools: Vercel, AWS (API Gateway, IAM, S3), Docker, Git, GitHub, Postman, Vitest, Microsoft Power Automate
AI & Development Tools: Claude Code, OpenAI Codex, Gemini, Model Context Protocol (MCP), AI-Assisted Context Steering (CLAUDE.md)
